FRESH & FROZEN FRUITS

Our 70 year- long tradition bears fruit: literally!

A sea of juice and tons of fruit later, our family is still as dedicated to our orchards as ever. The passion for hard work and love for nature is passed on from one generation to another. This is truly a labor of love and the world seems to notice. Companies from many different countries have put their trust in us and in return, we value that great gift and always deliver on our promise.

We do our best to supply our partners with the best in class Blueberries, Aronia berries, Currants or our specialty: Haskap berries. Treasures of Polish soil, the taste and aroma of which the whole world is delighted with.

The best fruit grows in Europe

When Asian juice producers ask us where the best fruit is growing, our answer is always truthfully: in Europe. The European Union has set very high requirements for fruit farms and only thanks to knowledge, experience, passion and the best technologies, it is possible to produce perfect berries and prepare juices as delicious as the taste of childhood. And yet Poland has been in the European Union for a long time.

When European producers of preserves ask us the same question, we tell them that the best berry fruits grow in Poland. They love our warm summers and cold winters, the coolness of summer nights and morning dew. This is why the berries are so sweet and aromatic. The whole world appreciates our crops and that is why we rank first in the production of berries.

NFC JUICES

WHAT IS NFC?

- The NFC stands for: **not from concentrate**.
- The nutritional value of our juice it **contains all the vitamins and microelements** present in the fruit.
- The taste and aroma are **100% natural**.
- Juice is made **from fresh fruit**
- **No artificial additives or enhancers** here.
- **No sugar** or sweeteners added.
- Every drop comes from **top quality, ripe and clean fruit**.
- All of our fruit comes from **tried and tested, certified orchards in Poland**

FREEZE-DRIED FRUITS

Freeze-drying (lyophilization) is a special process where frozen fruits and vegetables are placed in a refrigerated vacuum and ice crystals in the product are sublimated into water vapor. Thanks to high vacuum conditions and low temperature during the process the cell structure of the original raw material remains intact. This keeps the original form of food, preserves consistency and nutritional value as opposed to ir-dried food products.

BERRY EXTRA JAMS

A range of organic jams which have been created through constant search of intact, healthy, and full-bodied products, obtained from the cultivation of raw materials from organic only farming and in accordance with modern processes.

Neither too liquid nor too dense. Their perfect creaminess makes them suitable for the traditional breakfast, with warm bread and butter, and equally perfect for the preparation and finishing of both simple and elaborate desserts.

All of our jams are also available in ORGANIC variant!

POWDER CAPSULES

Freeze-drying process amplifies the nutritional properties of the world's healthiest superfruits. Raw freeze-drying removes water weight to ensure a higher concentration of actual berries, maximizing polyphenols, flavonoids, catechins, anthocyanins, resveratrol, and antioxidants.

The freeze-dried powder is encapsulated in a vegetarian-friendly capsule. With nothing synthetic and no derivatives of fruits, we just use the whole berry to make this capsule your convenient, healthy, anthocyanin-rich traveling companion.
